RE: ZBA2026-076, 801 Hanover Street, B-4

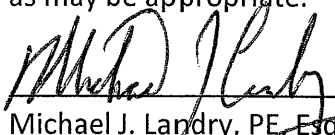

Zoning Relief Required for Use Permit

Your application for a permit dated **August 7, 2026** to establish a professional chiropractor office use, on a lot with **10,760 SF** of buildable lot area where **15,000 SF** is required, with parking in the front yard, where the required **5'** landscape buffer is not maintained around the perimeter of the parking area, with wall signage area of **7.7%** of the primary façade where **3%** is allowed, and where the wall signs total **40.9 SF** where **32 SF** is allowed in the **R-1B Zoning District**, all as per documents submitted through **August 8, 2026** and with non-compliance listed in the Zoning Review dated **August 17, 2026** is hereby acknowledged.

According to Section(s) **4.3.1-A Medical Clinic, 6.2-B.G Minimum Buildable Lot Area, 6.2-B-I Surface Parking Location, 8.1.3 Parking Lot Perimeter Landscape, and 9.6-A Allowable Signage (2 counts)** of the Zoning Ordinance of the City of Manchester, New Hampshire, passed to be ordained on March 1, 2026, this is prohibited. Consequently, I have no authority to grant this permit. Permit is hereby **DENIED**.

Required Action: Site Plan Approval

Further proceedings contemplated pertaining to this application must be pursuant to NH Revised Statutes Annotated 674:33 or the other statutory provisions relative to Zoning Boards of Adjustment, as may be appropriate.

Michael J. Landry, PE, Esq.
Deputy Director, Building Regulations

Re: Variance Application – 801 Hanover Street, Manchester, NH

Dear Members of the Zoning Board of Adjustment:

I am submitting this application for dimensional and other variances to facilitate the redevelopment of the long-vacant former gas station at 801 Hanover Street into a modern professional chiropractic office. As a 53-year-old chiropractor with 28+ years of experience and a lifelong commitment to New England communities, I am excited to invest in Manchester. This ~\$500,000 total project will eliminate a decades-long blighted eyesore, create local jobs, provide accessible healthcare services, and enhance the economic vitality of a high-visibility corridor. The enclosed materials include the completed Variance Criteria form, this narrative, my professional bio, preliminary site plans/renderings, and supporting documentation (structural, environmental, etc.).

The variances requested are necessary due to the property's unique physical constraints and history. I respectfully request placement on the next available hearing agenda and am available for a pre-application meeting at your earliest convenience.

Thank you for your time and consideration. I look forward to partnering with the City to transform this site into a community asset.

Sincerely,
Eric M. Borsini

Date: July 24, 2026

Property Location: 801 Hanover Street, Manchester, NH 03104 (corner of Hanover Street and Lake Avenue / Derryfield Lane area; approximately 0.207 acres; former gas station site)

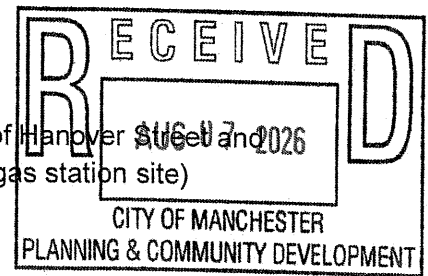

Owner: Aranasian Oil Company, Inc. (a/k/a Aranco Oil)

Applicant: Eric M. Borsini

25 Portsmouth Ave, Manchester, NH 03109

Phone: 937-876-9209

Email: DrBorsini@gmail.com

Relief Sought:

1. Relief from off-street parking setback requirements (minimum spaces/stalls located within the 10-foot setback). The proposed layout maintains safe vehicular circulation and adequate maneuvering space.

2. Relief from lot coverage / impervious surface limits to retain existing asphalt behind the building. Existing grade and proposed drainage measures will manage stormwater without adverse impact on neighboring properties.

3. Relief from building setback requirements (existing building to remain; no removal or reconstruction of the structure).

4. Relief as needed to permit professional office use in the applicable district.

5. Relief from sign regulations regarding backlit lettering and size in a residential-adjacent area, subject to the following conditions:

- Office hours: Monday through Friday 8:00 a.m. to 6:00 p.m.; occasional Saturday 8:00 a.m. to 12:00 noon; closed Sundays.

- Sign illumination only until 10:00 p.m.

- No direct light beams into residential windows.

- Building perimeter lighting limited to low-level security illumination.

6. Relief from the 70% front and side glass requirement.

7. Permission to use asphalt curbs (or eliminate curb requirements where existing slope already controls runoff).

8. Permission to install a 6-foot stockade fence behind and around the rear of the building for security and privacy. The fence will be located and configured so that it does not obstruct sight lines from any driveway or create a traffic-safety hazard.

9. Acceptance of the existing survey dated May 9, 2023 in lieu of a new survey (detailed site plans provided).

Variance responses:

1. The variance would not be contrary to the public interest because:

The proposed redevelopment of this long-vacant former gas station into a modern chiropractic office serves the public interest by eliminating a 30+ year blighted eyesore, improving public safety and aesthetics along a high-traffic corridor (20,000+ vehicles daily), creating local jobs, and providing essential healthcare services to the community. It aligns with the City's goals for economic development, blight removal, and revitalization of underutilized commercial sites without introducing incompatible or high-impact uses. The project includes environmental

remediation, proper stormwater management, and landscaping, enhancing rather than detracting from neighborhood character.

2. The spirit of the ordinance is observed because:

The spirit of the zoning ordinance, promoting appropriate commercial uses in business districts, orderly development, and protection of public welfare, is fully observed. A professional chiropractic office is a low-impact, compatible use that fits the general business character of the area. The variances (primarily for parking and site configuration due to the triangular/limited lot shape) enable reasonable development of this unique, constrained site while maintaining the ordinance's intent regarding traffic, access, and scale. Strict adherence would prevent any viable reuse, contrary to the ordinance's broader purposes of economic vitality and preventing blight.

3. Substantial justice would be done because:

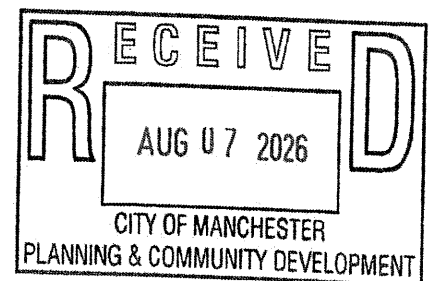

Granting the variance does substantial justice by allowing productive reuse of a property that has been unproductive and detrimental to the area for decades. The applicant has invested significant effort in due diligence (structural, environmental, engineering) and will undertake a substantial ~\$500k+ rehab, paying taxes and contributing to the community. Denying it would perpetuate the hardship on this site while similarly situated properties in business zones develop successfully. It balances private property rights with public benefit in a fair manner.

4. The values of surrounding properties would not be diminished because:

Redevelopment will enhance surrounding property values by removing a derelict eyesore, improving visual appeal with professional landscaping, lighting, and building upgrades, and increasing economic activity in the corridor. Professional offices like this stabilize and uplift mixed commercial/residential areas, as evidenced by successful nearby developments. No negative externalities (noise, traffic overflow, etc.) are anticipated with the proposed low-intensity medical use and on-site parking improvements.

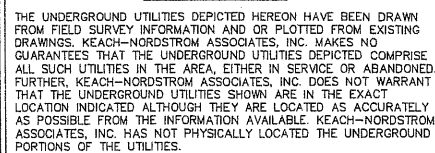

5. Literal enforcement of the provisions of the ordinance would result in unnecessary hardship if:

(B) Owing to the following special conditions of the property that distinguish it from other properties in the area. The irregular lot configuration (triangular shape with limited usable area from its former gas station use), its 30–40 years of vacancy and resulting blight, documented environmental and structural challenges requiring extensive remediation, and its high-visibility but constrained location. The property cannot be reasonably used in strict conformance with the ordinance. A variance is therefore necessary to enable a reasonable use of it: adaptive reuse as a professional chiropractic office with appropriate parking and site improvements. Without relief, the site would likely remain vacant indefinitely, continuing the public nuisance of blight.

Professional Biography

I am a licensed Doctor of Chiropractic with more than 28 years of clinical experience. Born and raised in Billerica, Massachusetts, I earned my Doctor of Chiropractic degree from Palmer College of Chiropractic in 1999.

I founded and successfully operated C.A.R.E. Chiropractic in Greenfield, Ohio for over 21 years. During that time, I built a thriving, profitable practice that delivered personalized, holistic care to thousands of patients. I maintained full operational responsibility for all aspects of the business — staffing, marketing, billing, and financial management.

Deeply committed to community leadership, I served five years as an elected Village Councilman and Finance Chairman in Greenfield. I helped solve a longstanding space shortage for the police department by reconfiguring existing municipal buildings, eliminating the need for a costly new facility and saving the village hundreds of thousands of dollars. I also served as President of the Greenfield Rotary Club and was named a Paul Harris Fellow for my service and humanitarian contributions.

In addition, I served as Assistant Scoutmaster, President of the Band Boosters, and a leader in my local church. During a teacher shortage, I volunteered as a substitute teacher at the high school and taught two semesters of Anatomy and Physiology as an adjunct professor at the local community college. I also personally remodeled and preserved four historic downtown buildings adjacent to my practice, which generated additional rental income. On a personal level, I fully gutted and renovated my own home as well as two homes for my sons, creating significant value and strong financial returns upon sale.

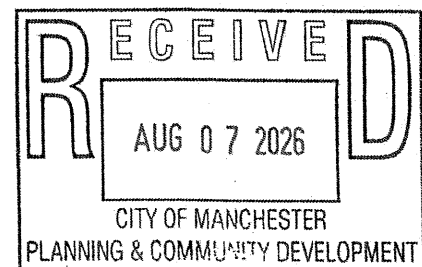

After a very successful career in Ohio, I returned to my New England roots. As my extended family gradually grew smaller, I realized how important it was to be closer to home. I sold my practice and properties and relocated to Manchester, New Hampshire. I currently practice as an associate chiropractor at Healing Lakes Chiropractic in Laconia. While I enjoy the role, I miss the autonomy and impact of practice ownership.

When the opportunity arose to purchase and renovate a blighted property just a one-minute walk from my home — with excellent visibility and over 20,000 daily passersby — I knew it was the right next step. This project will not only create new local jobs and provide high-quality chiropractic care to the community, but it will also transform a long-standing 30-year blighted property into a productive and attractive asset. The project perfectly aligns with my proven track record of

identifying opportunities, controlling costs, executing major renovations, and creating lasting value.

I look forward to once again owning my own practice, delivering the patient-centered care I am known for, and continuing my tradition of active community leadership and service in New Hampshire.

Dr. Eric M. Borsini

Petition in Support of Zoning Variances for 801 Hanover Street, Manchester, NH

We, the undersigned neighbors, support Eric Borsini's request for zoning variances to renovate the long-vacant former gas station at 801 Hanover Street into a chiropractic clinic offering chiropractic care, massage therapy, and nutrition services, along with parking lot improvements. We believe this project will clean up the property and bring a valuable service to the neighborhood.
