RE: ZBA2026-083, 248 Vinton Street, B-2

Zoning Relief Required for Building Permit

Your application for a permit dated **August 21, 2026** to maintain a deck with a ramp 2' from the rear lot line where 20' is required, maintain a covered deck in the rear yard 2' from the rear lot line where 4' is required, and maintain a small refuse totter storage box in the front yard in the **MX-1 Zoning District**, all as per documents submitted through **August 21, 2026** and with non-compliance listed in the Zoning Review dated **August 28, 2026** is hereby acknowledged.

According to Section(s) **5.3.1.A.3.F Minimum Rear Yard Setback** and **5.6.2.C Accessory Structures in the Rear Yard**, and **5.6.2.A Accessory Structures in the Front Yard** of the Zoning Ordinance of the City of Manchester, New Hampshire, passed to be ordained on March 1, 2026, this is prohibited. Consequently, I have no authority to grant this permit. Permit is hereby **DENIED**.

Further proceedings contemplated pertaining to this application must be pursuant to NH Revised Statutes Annotated 674:33 or the other statutory provisions relative to Zoning Boards of Adjustment, as may be appropriate.

Michael J. Landry, PE, Esq.

Relief Sought From Section(s): Article 5, Section 5.6.2 Article 4, Section 4.6.1-H-2 Article 5 Section A-3

1. The variance would not be contrary to the public interest because: See attached

3. Substantial justice would be done because: See attached

4. The values of surrounding properties would not be diminished because: b

5. Literal enforcement of the provisions of the ordinance would result in unnecessary hardship if:

(A) Owing to the following special conditions of the property that distinguish it from other properties in the area:

- i. No fair and substantial relationship exists between the general purposes of the ordinance provisions and the specific application of that provision to the property; and**
- ii. The proposed use is a reasonable one.**

Or (B) Owing to the following special conditions of the property that distinguish it from other properties in the area, the property cannot be reasonably used in strict conformance with the ordinance, and a variance is therefore necessary to enable a reasonable use of it.

See attached

1. The variance would not be contrary to the public interest because:

- a. There are two parts to the request for a deck setback encroachment variance:
 - 1. The first deck variance remedies a stipulation in a 2004 front deck permit requiring a subsequent variance.
 - 2. The second seeks to properly document the rear deck and patio that was constructed approximately forty years ago.
- b. The shed setback variance allows a deteriorating preexisting metal shed with a more suitable one. It also remedies a hardship caused by an odd-shaped lot.
- c. The front yard storage variance will not alter the character of the neighborhood, as it is intended to blend the preexisting trash storage with the existing fence. An arbor vitae has been planted in front of the enclosure that will all but hide it when mature. Many residences in this neighborhood have refuse containers visible from the street. This variance will reduce that number by one.

2. The spirit of the ordinance is preserved because:

- a. Decks:
 - 1. The front deck is consistent with residences in the immediate area.
 - 2. The rear deck is not visible to any abutters at ground level and is behind a solid fence. In the case of interior lots, this is common for both the interior lot and the lots behind it.
- b. A deteriorating metal shed will remain if the variance is not granted. It is an eyesore, particularly to abutters Trepanier and Stefanik from their upper floors. Because the shed is not separated by much from the dwelling, a condition of the variance should be that no liquid fuel be stored in the shed.
- c. The storage box provides a solution to a lot-length problem while blending with the adjacent fence.

3. Substantial justice would be done because:

- a. The deck variance would allow fair use of the front and rear yards that are severely limited by the shape of the lot.
- b. The shed replacement would replace an existing eyesore visible to 2 abutters from their upper floors. In particular, a slightly taller and 2-foot deeper shed will remove the current need to store some materials on the roof of the shed.
- c. The trash storage box would provide relief for the applicants due to the shape of their lot and the distance from the side of the dwelling to the street. The distance from the street to the box is greater than most of the nearby residents have from the street to the side of their dwelling.

4. The value of surrounding properties would not be diminished because:

- a. The decks increase property values because
 - 1. The front deck provides a clean, comfortable place to sit and view the front garden, while improving access to the front door.

2. The rear decking was untreated, painted wood that was often rotted and unsightly. The treated framing was retained, and the decking was replaced with Azek composite decking. The adjacent patio area was concrete and gravel clad with dated plastic grid panels that followed the slope of the concrete. Those were replaced with Azek composite that is now furred just enough to level the patio. This creates a modern, attractive rear yard, constructed with high-value materials, creating what many visitors have described as an oasis in the middle of the block.
 - b. Would replace an eyesore with a modern shed. A Reeds Ferry American Classic shed is anticipated as the replacement.
 - c. Would improve the neighborhood by placing one set of trash containers out of the public view.
5. **Literal enforcement of the provisions of the ordinance would result in unnecessary hardship if:**

(B) Owing to the following special conditions of the property that distinguish it from other properties in the area, the property cannot be reasonably used in strict conformance with the ordinance, and a variance is therefore necessary to enable a reasonable use of it.

- a. The lot is one of a very few interior lots remaining in Manchester. Unlike the vast majority of single-family lots in the R-1, R-2, and MX-1 zones, the rear of the house is within feet of the current setback requirement. For over sixty years, there has been a concrete and gravel patio.

In 2004, the late husband of the current homeowner drew a permit for a deck that would encroach into the side setback. At the time, there was a stipulation that a variance would be sought upon completion of the project. Unfortunately, he passed away without having told his widow about the variance requirement.

Over the years, the existing rear deck leading to a concrete and gravel patio has been repaired numerous times and was finally re-clad in composite decking over the original framing. The concrete patio was also covered in composite boards at grade, with only as much furring as needed to level it. Some leftover decking was also used to level and cover an adjacent patch of gravel for the homeowner's gas grill. If the variance is not granted, the homeowner will lose fair use of a comfortable deck and patio. This request seeks to fulfill an oversight regarding the original 2004 permit and to document a preexisting deck and patio that dated back to the 1980s.

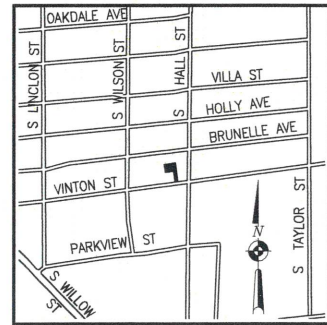

- b. The preexisting shed has outlived its usefulness. Its roof has been covered, its door replaced, and its walls patched, but it continues to

deteriorate. Its replacement requires a variance due to setback issues common to the interior lot design. There is literally no location in the rear yard that will not encroach on a setback. A slightly taller and 2-foot deeper shed is desired to give capacity to clean up that part of the yard.

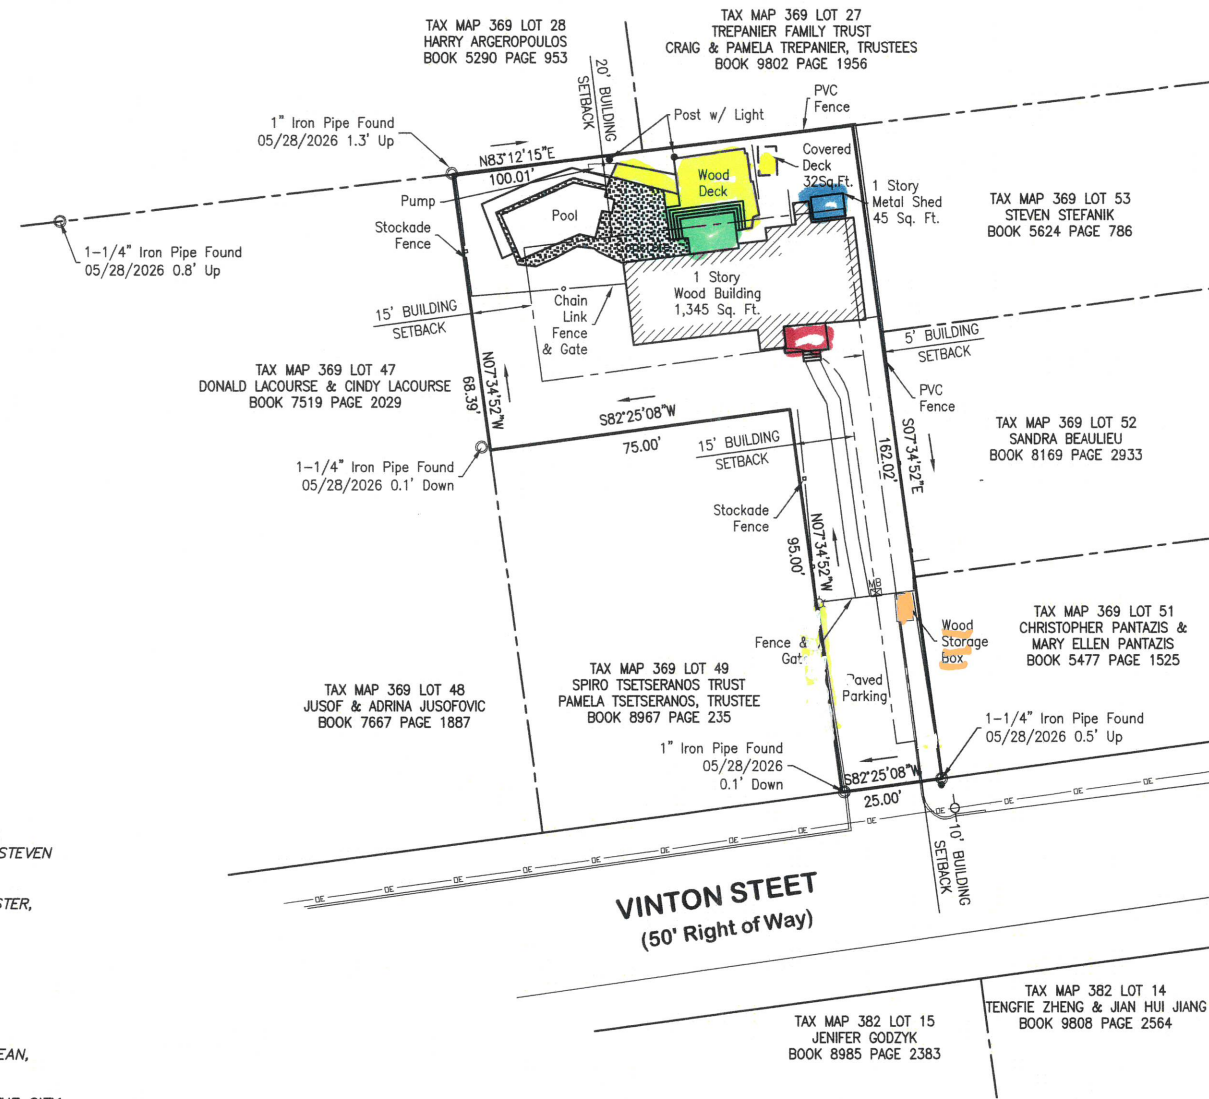

If the variance is granted, the two abutters, Stefanic and Trepanier, who can see it from their upper floors, will have a more pleasant view, and the homeowner will not find it necessary to store some garden items on the shed roof. It is expected that the shed will be replaced within the next year.

- c. Literal enforcement of the ordinance regarding placement of refuse containers would require that they be placed behind the front of the dwelling. As can be seen from the attached Google Maps photo and boundary survey, that would mean a trip greater than half the width of the block, some of which is over lawn areas. There is also a setback issue for the storage container.

For decades, there have been various commercial plastic storage containers used to hide the refuse containers at the current location. The latest one has been replaced by a wooden one painted to match the surrounding fence corner. The homeowner is requesting a variance because this is a replacement for the preexisting storage container. In an area where the majority of trash bins are visible from the street, this variance would reduce that number by one.
